## Objective

Work as a Game Designer and use my skills and gaming knowledge for creating great games and help the company to progress. Work with creative people and create fun and entertaining experiences for players with innovative ideas.

## Experience:

### Professional: (Game Design)

- Worked as game designer on Monopoly Slots, Bejeweled Blitz, Deer Hunter Classic, Farmville 2.
- Creating new features and improving existing features.
- Tweaking the game mechanics and making prototypes in Unity for new features.
- Data driven design – improving the game mechanics by data analysis.
- Competitor's game and feature analysis to decide feature path for games.
- Working with game producers to decide road map for game
- Monopoly Slots - tweaking different slot machines and balancing it in Unity.
- Level Design in Unity for Deer Hunter Classic. Worked on hundreds of levels every month.
- Game balancing by adjusting user XP curve, scoring and rewards.
- Writing game design documents.

### Professional: (QA - June 2009 to March 2015)

- Worked as Sr. Quality Analyst in EA on various in house studio mobile projects - The Sims Freeplay, FIFA, NFS The Run, Bejeweled Blitz, Plants vs Zombies, Mortal Kombat, Tetris
- Worked as Test Lead in GlobalStep Game Testing services on Console games on Disney titles (PS3 & Xbox 360) – Toy Story 3, Alice in Wonderland, Split Second and Tron Evolution
- 5+ years of experience in QA on different games and platforms including Console and PC

## Personal

- Excellent at creating game prototypes in Unreal Engine 4 and Unity including Game Design, Level Design, Balancing using Visual Scripting or C#.
- Designing mods/levels in games like Skyrim, Far Cry, Fallout 4 and DOOM.
- Good working knowledge of game engines like Creation Engine by Bethesda Games and Dunia Engine by Ubisoft Games.
- Creating basic art and UI elements using Photoshop for personal game prototypes.

## Professional Roles and Responsibilities

- Good knowledge of Bethesda's Creation Kit for making mods in games like Skyrim and Fallout 4.
- Knowledge of level editors for games such as DOOM and FarCry to create new levels.
- Good knowledge of PC hardware and working experience on different consoles and mobile/tablet devices.

## About Me

I'm a passionate gamer and game designer. I like different genres of games – RPG, FPS, Sports, Simulation, Action, MMO, Platformers, CCGs, Point & Click Adventure and Casual. I spend most of my time – playing games on PC, PS4, sometimes mobile, working on my game prototypes with new ideas. I like reading the game articles/news, interviews, development diaries, game industry trends, new technology, games history and space. Apart from gaming I'm a big fan of Lord of the Rings and Star Wars.
