- Proficient in applying critical thinking skills to drive innovative game design solutions.
- Effective communicator: Adept at collaborating with cross-functional teams, conveying complex design concepts, and facilitating clear and concise communication throughout the game development process.
- Game Engines and Level Editors: Experience with Bethesda's Creation Kit for modding games like Skyrim and Fallout 4, as well as level editors for DOOM, FarCry, Fortnite and Portal.
- Tools and Software: Generative AI, Great at Excel, Photoshop, Miro, Microsoft Office Suite, Premier Pro, Adobe XD, Confluence, JIRA and video editing software.
- Hardware and Platforms: Proficient in PC hardware and experienced with different consoles and mobile/tablet devices.

Education

Bachelor of Science in Computer Science, Amravati University, India

- Bachelor's degree in Computer Science, with coursework in Mathematics and Physics.
- Strong understanding of computer technologies
- Basic knowledge of programming languages: C and C++

About Me

Passionate gamer and dedicated game designer with a deep appreciation for RPGs set in high fantasy realms. Proactively explores novel game mechanics and ideas while remaining up to date with industry trends and emerging technologies. Avid consumer of game articles, books, interviews, podcasts and development diaries to continuously expand knowledge and expertise. Fan of beloved franchises such as The Lord of the Rings and Star Wars. Outside of gaming, I find joy in embarking on forest treks and adventure expeditions, listening to StarTalk podcasts to expand my knowledge of science and space.
